

## How do I upload a vid?

Last Modified on 03/23/2021 12:50 pm EDT

You just created your 1st awesome vid you want to upload –~~sexy or safe-for-work with no nudity~~– it's totally up to you!

To get started uploading vids, first go to your drop-down menu > My Content > Upload Vids; or, from your profile click the blue button under your profile pic. You will be brought to a page where you can either select or drag and drop the vid file you wish to upload!

Drag and drop the vid file to the upload section or click "Select Vids to Upload" and locate the vid file. *Please note: We accept MP4, M4V and MOV files.*

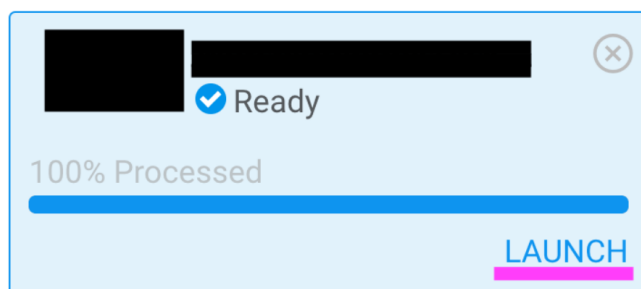

Drop Your Vids Here or  
[Select Vids to Upload](#)

To combat piracy, we've added digital finger-printing to every vid uploaded.  
Please remove any undesired meta information from your video file.

Once added, your vids will begin uploading right away! When fully uploaded, the vid will then begin Processing which means the file has reached our servers and is being converted for streaming and download purposes.

During processing you can click to add all the details to your vid such as the title, description, tags, price, etc.

When the vid is fully processed, click to do a final check on all the details and [create a teaser](#) and [thumbnail](#) for your vid.

How long does it usually take to upload a vid?

On average every vid takes about 5 mins to upload and then about 2 minutes to edit (that is: set your price, enter a description, select a cover image, etc.). Uploading time will depend on file size, speed of your internet connection & the length of your vid.
