

## How do I change my Stage Name?

Last Modified on 04/05/2021 11:01 am EDT

Need to change your Stage Name? Here's how:

1. Click the drop-down menu > My MV > Settings and click 'View' next to the 'Account' section.
2. Type in your new name in the box next to "Display Name"
3. Enter your password in the "Current Password" field
4. Hit Save!

That's it! Once you update your display name, your personalized URL will be updated as well.

You may notice this doesn't effect the name at the top of the Account section. The name that displays there is the original username used at signup and can only be seen by you.

Please note, in the Account section of your Settings, you can also add your various aliases to make sure you turn up in searches under other names people might search for you by!

Need to update or edit other options in your account? Visit our Help Center section [Account Settings](#) for information.
