

How can I verify another performer for Live?

Last Modified on 04/08/2025 5:25 pm EDT

You are allowed to appear with other Creators or non Creator co-performers during your Live session!

If performing with a **co-performer that is not currently a Creator**, please ensure that you have a copy of their valid government issued photo ID, as we may ask for a copy of the documentation.

If you plan to record your live show with another performer to post on your profile for sale, be advised that you'll need to keep a copy of their ID and a signed release form on file as they need to be declared as co-performers via the site vid uploader. You can find our blank release form [here](#).
