

How do I download my own vids from MV?

Last Modified on 10/15/2020 11:40 am EDT

To download your own vids, locate the vid either through your profile and hit or from the Content Manager (drop-down menu > My MV > Content Manager) click the 3-dots to the right of the vid and hit .

From the Edit Details page of the vid, the vid stream shows on the right and just under this you will see a blue button. Click the button and follow the instructions to download your vid!

*Members have the option to select between downloading the **Original file** or an **Optimized file** format of your vids.*
