

Login Issue - Says I am a Robot/Not Human

Last Modified on 10/19/2021 10:00 pm EDT

Are you getting an error when logging in that says you are a robot or not human? This is an issue with Google's new captcha system and therefore we can't be totally sure what causes this.

You can try logging in again using Chrome as your web browser in Incognito Mode as this has been shown to resolve the issue in most cases. Another step that has been shown to help is disabling any browser extensions as they may be prompting this issue.
