

## How do I connect my Lovense toy to Live?

Last Modified on 07/09/2024 2:53 pm EDT

### What you'll need

Your wireless compatible Lovense toy vibrates when members tip with tokens during your Live show. To connect your Lovense toy to Live, you will need:

- A laptop or desktop device
- The [Lovense Chrome extension](#) (ensure you are using version v30.9.7 or higher)
- You will also need the [Lovense Connect app](#) (if you're using an Apple device, Lovense toys can connect directly via Bluetooth to your streaming computer)

### Connecting Lovense to Live

Once you have everything you need

1. [Connect your toy to the Chrome extension](#)
2. [Add ManyVids as your camsite](#)
3. Open an [Live room](#). You should see a Lovense widget on your live room page

That's it! You are now ready to live cam with your Lovense and you can connect up to 9 toys to play with while you're performing in your Live room. Any token tips that meet one of the levels you set will activate the toy, including: tip menu options, custom tips, Show Love and Make It Rain.

Members can click the <More> button in your live chat to see what settings you have set for your Lovense toy so they know how to activate it.

### Troubleshooting common Lovense issues

- If you see the Lovense icon, but it is not green, try refreshing the page.
- If you do not see the Lovense icon and you have the Extension installed, try turning the extension off and then on again and refreshing your streaming page.
