

How do I create a vid thumbnail?

Last Modified on 06/03/2021 3:49 pm EDT

A thumbnail is the image that displays on vids until the vid is hovered over or clicked on.

How do I create a thumbnail for my vid?

Simply, click on once your vid has fully uploaded and processed and then click . A drop-down menu will appear with two options for creating your thumbnail. You can chose to select a thumbnail directly from your vid or upload your own thumbnail. See the screenshot below:

Creating a teaser using the 'Select from vid' option

This option lets you use a still from your vid as the thumbnail. First, the vid needs to be played and paused at the desired frame.

Next, click
