

How do I choose my Content Preferences?

Last Modified on 03/19/2025 5:01 pm EDT

At MV, we believe in providing a personalized and enjoyable experience tailored to your preferences. One of the best ways to ensure that your viewing journey aligns with your interests is by customizing your Content Preferences. With this feature, you can filter and refine the content you see based on what best suits you. Whether you're looking for specific account types or need to toggle between Safe for Work (SFW) and Not Safe for Work (NSFW) content, we've got you covered!

Here's everything you need to know about Content Preferences and how you can personalize your MV experience.

Getting Started: Selecting Your Content Preferences

Upon entering MV for the first time, you'll be prompted to select your Content Preferences. This will determine the type of accounts and content you encounter across various pages, such as recommended vids and search results. The available options are:

- **All:** Displays all content uploaded to MV, regardless of type.
- **Straight:** Shows content from Woman Creators, Man (Straight) Creators, and Producer (Straight) accounts.
- **Gay:** Focuses on content from Man (Gay) Creators and Producer (Gay) accounts.
- **Trans:** Includes content from Trans Creators and Producer Trans accounts.

This initial setup ensures that your experience is tailored right from the start, based on your preferred content style.

Additional Customization: SFW vs. NSFW Content

You can also toggle between SFW (Safe for Work) and NSFW (Not Safe for Work) content. For those who prefer to explore adult content, you can refine your preferences even further by selecting a category within the Adult Community. The available options within the adult community are:

- **All:** Includes all adult content.
 - **Straight:** Filters adult content specifically from Straight Creators.
 - **Gay:** Focuses on adult content from Gay Creators.
 - **Trans:** Highlights content from Trans Creators.
-

Changing Your Content Preferences

We understand that preferences may change, and you can easily update them at any time. To modify your Content Preferences, simply navigate to the drop-down menu and select Content Preferences. This gives you the flexibility to adjust the type of content you see across the platform, whether you're in the mood to explore different account types or reset your preferences altogether.

You can always revisit and change your settings. Whether you want to explore more adult content, refine your preferences further, or switch between SFW and NSFW, it's all possible. The Content Preference Page allows you to tweak these settings at any time.

How it Works: Seamless Content Experience

Once you've selected your Content Preferences, your settings will be saved and applied across various pages. Here's how this affects your browsing:

- **Home Page:** You will see content recommended based on your preferences.
- **Vid Search Results:** Search results will reflect your selected preferences, ensuring relevant content is displayed.
- **Creator Profile Pages:** The type of creators shown will be filtered according to your preferences.
- **Adult Community Page:** For those who toggle to NSFW, this section will be customized based on your selection.

Start exploring your preferences today and enjoy a customized MV experience!
