

## What is the "Edit Vid" button under my vids ?

Last Modified on 05/31/2021 2:11 pm EDT

If you take a look at your store, you will notice a small "Edit" button on the vids you have uploaded.

This is a handy tool that takes you back into the vid's edit page so you can make necessary changes like *adjust the price, replace the vid, change the vid preview or thumbnail, change your co-performer declaration* etc.

Note: When editing previously uploaded vids, MV Stars will be prompted to make a selection in the Co-performer declaration area, and add any co-performer documentation before changes can be saved.

For detailed instructions on how to edit your vids, please click [here!](#)
