

How do I search for content on ManyVids?

Last Modified on 03/13/2024 5:09 pm EDT

On ManyVids, there are many ways to find the content you're looking for.

The first and most accessible area is the search bar, found on the site's header:

After searching here, you can opt to search using different categories:

All - This will search the site for the key words you have typed. This is a broad search that looks for each word in any and all areas of ManyVids

Vids - Searching under this filter will look for the keywords you have typed in vid titles and descriptions.

Creators - This will limit the search to finding the specific Creator with the keywords in their stage name.

Items - Will show results that focus more on store item names and descriptions.

If you are looking to search for specific vids that fit a certain style or category, "Advanced Search" is for you!

Clicking the "Advanced Search" option will unlock further search parameters to get you exactly the vid you're looking for.

One way of looking through the different vids that we have on the site is to filter via the different sort categories available:

The default vids presented will be Newest Vids but you can change the filter to the many different categories:

- Being Viewed - Those that are currently being viewed by other site users.
- Newest Vids - The latest uploads from Creators.
- Most Views - These are vids that have had the most number of views (a combination of preview views and full views)

If you wish to further fine-tune your searching, you can also be more specific in what you're looking for by setting the parameters on the left hand side of the Advanced Search page.

Addition advanced search filter
options.

There is truly something for everyone on ManyVids!
