

Should I think about buying a camera?

Last Modified on 12/20/2022 4:06 pm EST

Investing in a camera can be a great career move. You don't need it to get started, but you can always start shooting on a phone and reinvest your earnings to upgrade to a better camera. You can get a decent camera to film your vids in the range of \$400 to \$1200 USD.

The amount of money you can spend on amazing equipment is endless, but that is really up to you and not necessary to become a successful Creator.
