

## How are my MV Live recordings saved?

Last Modified on 04/19/2021 12:32 pm EDT

Every recorded vid file will be auto saved with a file name in a specific format. For example, "LivePUBL-0829-1223-5.mp4." It starts with LIVE followed by PUBL or PRIV indicating if the recording took place during a public or private session, then the month and day in numeric format, and finally the hour and minute (in MV Time).

The recording will appear in your vid uploader. If you prefer not to publish your recording right away, you can download the vid onto your computer and/or any other device.
