How do I block certain regions or countries from viewing my profile or live shows?

Effective August 1, 2025: On Landers, we will remove the restriction for region block to always show the Top 4 (no matter what regions are blocked). If your location is blocked, users will not be able to access the profile and will instead see a page that tells them the profile is inaccessible due to your region being blocked.

What if I don't want people from my local area to see my profile and vids? You are always in control of who is allowed to access your content. You can block states, regions, provinces, or countries where you want your

content hidden!

On MV you can block up to 3 regions as well as 3 entire countries from being able to access your profile and they will also be prevented from viewing your MV Live room.

To add blocked regions/countries to your account, follow these steps:

- Go to your drop-down menu > Security Center
- Find "Content Location Block" and click <View>
- Select the regions and / or countries you wish to block
- Press <Save>

How do I add or remove Two-Step Verification on my account?

Two-Step Verification is a great option for adding extra security to your account to prevent anyone aside from yourself from logging in. At login, after entering your username and password, you will be asked for a 6-digit code which would be generated by a verification app on your mobile device.

Adding Two-Step Verification to your account

To activate this feature:

- Go to your drop-down menu
- Security Center
- Two-Step Verification

You will be prompted to enter your password and from there the page will let you know which apps work with this service.

Download one of the recommended apps onto your mobile device and then scan the QR code on MV using the app. Once done, you will get a 6-digit code from the app to verify and activate the feature.

Next time you go to login, the extra step of using the verification app will be added, so you'll need to enter the 6-digit code generated by the app to access your account.

Removing Two-Step Verification from your account

If you no longer have access to the verification app and therefore cannot generate the 6-digit code to access your account, you'll need to have the feature removed from your account by MV Support. Please contact help@manyvids.com using the email attached to your account, and we'll let you know what we need in order to verify you as the account owner and have this feature removed.
