## I found my vid on another site. How do I submit a DMCA takedown request?

Here at MV we want to make sure you and only you have a say as to where your content is distributed, that's why we partnered up with DMCAForce and DigiRegs to scan the web regularly for material pirated from our MV Stars and submit takedown requests to have the content removed as quickly and efficiently as possible. All your vids are imprinted with a unique digital fingerprint which allows our DMCA partners to easily do frequent scans for stolen copies of your vids and submit legally binding takedown requests on your behalf.

In cases where the vids remain up, you can always submit the links to the content to us directly at MV Support using the form below.

When sending these links, make sure to send a link that points directly to the stolen content where the vid is being streamed to

ensure the DMCA takedown request is properly submitted. If the file is up for download on a file-sharing site, make sure to send us the page where the file is directly downloadable.

On MV, we keep a list of words that are forbidden for use in titles and descriptions on Vids, Store Items, etc. You can find this list by visiting this link: <https://info.manyvids.com/home/forbidden-words>. The reason we forbid these words is to ensure we remain compliant with our payment processors as well as to maintain a safe and welcoming community.

## What Vid categories and fetishes are available on MV?

**We have an incredible number of categories, almost endless, that you can choose from.** Tag your images and SFW or NSFW vids so members can easily find both your sexy and safe for work vids.

When adding your Vids to MV, you'll want to make sure to apply the appropriate categories to give yourself the best chance to be found by members who are searching for that type of content. You can find a list of all our accepted vid categories at the following link:

## Why do some Vids have an extreme content warning?

If the content of a vid has been flagged by our Trust and Safety Team as potentially disturbing to some viewers but still falls within our accepted categories, a warning message will be displayed on top of that specific vid.

We do this to allow the uploading of vids featuring risqué and taboo themes while allowing our Members and MV Stars the choice to opt out of viewing content that may be offensive to them.

## What happens if my vid gets flagged/reported?

We take rule violations on MV very seriously in order to maintain a safe and welcoming community as well as to make sure we remain compliant with our payment processors. Every vid that is flagged/reported to us is investigated by the MV Support Team and any MV Star hosting content that breaks our site rules will have the offending vid removed and receive a warning via email. Depending on the severity of the offence, further action may be taken; this also applies if there are multiple infractions on the account.

We also understand that at times, a rule may be violated due to lack of understanding of our upload rules and we make sure that the MV Star in question is informed as to the rule being broken. At the time the warning is sent, the MV Star is required to audit their profile to ensure there is no other infringing content.

For confidentiality reasons, any action taken will remain confidential between the MV Star and ManyVids.

Making sure MV is a safe place is a top priority for us and it's easier to accomplish this with help from our MV Community, so if you see something you feel could be a potential rule violation, [be sure to report it to us for review](#).

## Do I have to go out and buy a bunch of fancy equipment?

Getting started producing your own content for your MV Profile is even easier than you think! In fact, you probably already have the tools you need to make an amazing vid right now! Most modern smartphones have a camera that's of a quality high enough to shoot fantastic footage with! The same goes for many tablets and laptops as well.

We have all heard of music videos, great commercials and even full movies that were filmed with smart phones. With smart phones, it's truly possible and easy to create amazing footage.

You can buy a better camera to film content with if you want to, but it's really not necessary in order to get started.

*Want to learn more about filming content on ManyVids?* Take a look at our MVU class for all the details: [What do I Need to Start Filming?](#)

## What do I need to know to shoot content with my phone?

If you plan to shoot using your smart phone, here's what we recommend:

- Be sure to always use the main camera (not the selfie camera)
- Position your cellphone horizontally, not vertically. This will have a much better end result.
- Check the camera settings to make sure you're filming in highest possible resolution. You can record in HD resolution but if your cellphone has the option to shoot in 4K then that's even better!
- If you're looking for the perfect angle, you can get some simple accessories like a selfie stick, or small tripod. These are often inexpensive and help take your content to the next level!

## Do I have to buy a new phone to shoot with or a computer to edit with?

If you have a very old smartphone or no smartphone and you want to watch your budget then a used or refurbished phone should work great, try to get a model that came out in the last 16 months and check the camera specs before buying it.

If you want to edit your vids, you can edit on smartphones or tablets too, though there's sometimes advantages to working on a computer. For iPhones you can use the free iMovie app, but there are plenty of options out there. Feel free to check the App Store or Google Play App store for the application that suits you best!

If editing is not something that you're into, you can also opt for the easier style vids and just hit record and film everything in 1 take, start to finish with no cuts. You are unique and your content is too so anything you create will be awesome!

## Can I film using a desktop computer or laptop?

Yes. If you have a Desktop you want to shoot with you will probably have to buy a Webcam. We recommend getting one with HD resolution. Webcams are not too expensive and they can also be used to generate extra income by camming on MV Live. If you have a laptop, most of them have a decent internal webcam.

In order to record with a computer, you will have to use a recording software on your desktop or laptop, the programs Camera App for Windows and PhotoBooth on a Mac are both great options.

If you have 2 of the above-mentioned devices, you can use both to record at the same time if you want to get some different angles. This can be really fun for your viewers!

Also, another really neat and cost-efficient way to create new vids is to simply record your MV Live cam shows on ManyVids. We offer a built-in free feature which makes this effortless! When you're live streaming on MV Live, you can hit the Record button to start and stop filming. If you recorded for over 1 minute, the file will automatically show up in your vid upload queue ready to be launched on your MV Profile to sell!

## Should I think about buying a camera?

Investing in a camera can be a great career move. You don't need it to get started, but you can always start shooting on a phone and reinvest your earnings to upgrade to a better camera. You can get a decent camera to film your vids in the range of \$400 to \$1200 USD.

The amount of money you can spend on amazing equipment is endless, but that is really up to you and not necessary to become a successful MV Star.

## Tips for lighting and audio

These too are important aspects of creating successful content! And truly, to achieve the best result, you need to consider lighting. You can shoot close to window taking advantage of the natural light, but getting lighting gear to have more control over your shoot is not a bad idea—you can get a good quality ring light at a budget price or invest in a few vid lights.

The audio is as important as the image, so try to avoid background noises, "white noise," and strange sounds that can distract your audience. And if you have music of any kind make sure it's royalty free music and doesn't violate any copyrights.

## What advice do you have for editing?

Again, you can edit on a phone or tablet but if you have a relatively fast computer you may want to use that for editing your masterpiece: To do so you must transfer the vid files from your cellphone or camera to your computer and load them into the editing software of your choice: Some great free options are Movie Maker for Windows and iMovie for Macs.

Once your raw footage is loaded into the software you can cut out parts of it, rearrange scenes, add music or text, incorporate different angles, and more!

It's very easy to do and your final result will be compelling content that you can be proud of!

## Is there anything else I should consider when filming my content?

Yes, we have a few tips that apply to any shoot. The first is to try to stabilize your shot using a tripod or placing your cellphone or camera on a solid surface like a table. Next is to be always be careful of your framing: avoid crooked framing and make sure that what is in frame is what you want in frame. And the final one is small but important, remember to always to clean your cellphone or camera lens before shooting.

And last but not least, just have fun! Explore. Try things out and learn how to become the best videographer you can be. If you have never done this before, more power to you. Sometimes taking a new path and learning something new are just what you need to be a revolutionary! Life should be about learning and evolving toward new experiences.

## Does ManyVids set a price for my vids?

As you know by now, on ManyVids you always have full control over your content, and you can sell whatever you believe your vid is worth! MV Stars can charge a minimum of \$1.99 per vid up to a maximum of \$999.99 per vid. And, of course you can also have free vids as promotional tools, for brand building, or just because you want to share your passions with the world!

For more tips on how to price your content, you can watch Episode 6 of *MVU- Pricing*. This class will explain the price ranges you can set your vids to and how having a few FREE vids can attract new loyal fans!

## I want to get the pricing just right; do you have any tips?

If you're unsure where to start, the easiest thing to do is take a look at how other MV Stars with similar content are pricing their vids. You'll find inspiration for everything from categories, price points, and more. But at the end of the day, nobody knows your content like you do!

Depending on the length of your vid and what's in it, an easy and interesting way of pricing your vids can be on a per-minute basis. Here's an example:

Say, you have a 10-minute vid that was not super complicated to create. You can charge \$1 or \$2 per minute.

Or you have another vid that required a lot of work to make! The editing was challenging, and you had to pay someone because it was a collaborative vid, so maybe charging \$6 or \$7 per minute would be better.

Another way you can also price your vids is to set a base cost of X amount and then cost your vid per minute. For example: if you have a 10-minute vid and your base is \$4 + \$1 per minute. That 10-minute vids will be sold at 14\$.

Obviously, you can adjust your pricing depending on what currency you are more comfortable calculating your revenue in.

You'll want to watch the [MVU](#) class on pricing your vids to better understand how to price your content! Take a look at [MVU Episode 6](#) for all of the details.

## Should all my vids be in the same price range?

We'd suggest offering a few different price ranges, plus some free content.

So, for example, the lower price range would be vids (let's say less than \$7). Then, you can have a middle range with content from \$10 to \$40 and a higher range with vids \$80 and up.

Most of your vids should be in your middle range, whatever that may be.

And once they start buying your middle range vids, they'll love you and your amazing work so much they'll want to purchase your higher priced content!

Your true fans will put money aside to buy your higher priced content that they've been wanting for a while!

Our *MVU* class, [How to Price Your Content](#), will help you better understand how to price content on ManyVids!

## Once I set the price for a vid is it locked in?

Absolutely not! You can alter the price of any vid at any time. Freedom and flexibility are what we always strive for.

This is helpful because in the beginning, you may want to do some trial and error to find out what pricing works best for you and your fans. Before you know it, you'll find a sweet spot that works for you and setting prices will become second nature!

## What is a clip site?

A clip site is an e-commerce platform where you set up an online store, and customers purchase products and services à la carte. It's really not that different in practice then sites like Amazon, Etsy, or eBay!

You can sell vids through your MV Profile because we function as an e-commerce platform where you're the seller and you can set your own listings, prices, and control your own shop! But that's not all you can do!

On MV, you can:

- Sell individual [vids](#)
- Sell all your vids at once – [Membership](#)
- Live stream and earn token tips – [MV Live](#)
- Sell [Custom Vids](#)
- Earn [Tips](#) and [Gratuities](#)
- Sell [Store items](#)
- Engage fans and build a following on [FanClub](#) and
- Sell [fan-site subscriptions!](#)

Members can browse through vid previews and the items that are offered for sale without having to pay for anything until they choose what they want. It's like walking into a physical store and getting the chance to select what you want to buy!

## What is a fan site?

A fan site is a private channel where influencers frequently post content, and fans pay a monthly subscription fee to view your feed. Something similar would be paying a monthly subscription to access an influencer's Snapchat or Instagram.

You can sell monthly subscriptions to your fansite through your MV Profile as well where you set your monthly cost, and send out regular updates via pics, vids and messages to your subscribers!

Members will pay a monthly subscription to view your fansite content. It's like a private club where subscribers have to pay an entrance fee before seeing who is in the club and what is happening inside.

## What should a successful MV Profile have?

There's a lot you can do to optimize your MV Profile but the good news is, setting it up is fun!

First, upload a great pic of yourself as your Avatar & Profile pic. An avatar is the small circular image that is displayed next to your comments, posts, etc. on FanClub. Your Profile pic is the longer vertical image that shows on the left within your MV Profile.

Next, you have the option to upload a Teaser and an MV Intro! A teaser is a short preview vid that plays when a member hovers over your circular avatar. An MV Intro is very similar, only it's the short preview vid that plays when a member hovers over your longer portrait pic on the profile! These two options are a great way for members to see your content style and quality with a simple hover of their mouse!

Then, beneath your profile pic, you can enter a brief bio or engaging statement that you feel represents you to help engage your audience. It's got to be brief and punchy as the limit is 100 characters long.

Lastly, we encourage you to start uploading your content to your MV Store and take the opportunity to show-case your creative

work in the 'Pics' tab!

*Did you know...* If you have more than 7 vids, 5 store items, 15 pictures, a profile picture, and a completed About Me section, it will **increase your chances of selling** of almost 55% compared to a profile with less choices.

## Can I upload multiple vids at once?

So, if you've been busy and you're sitting on a golden collection of fun, funny, creative, and sexy vids then get them up and you'll be making your first vid sales in no time!
