

## I've received a DMCA takedown from MV

Last Modified on 08/12/2023 4:53 pm EDT

MV's DMCA partners are always searching the internet to find pirated content. Sometimes, though, they'll accidentally flag content you uploaded elsewhere.

It's important to respond as quickly as possible when you receive a DMCA takedown. As such *please directly contact our partners at [support@digiregs.net](mailto:support@digiregs.net) with the following:*

1. Your MV store URL
2. Any background you can provide on anyone else who has rights to the content, such as in the case of content sharing, etc.
3. If you have official channels elsewhere, include links so they can be whitelisted

Our DMCA partners will be able to promptly retract the notice and make sure any new ones won't go out.

You can also follow these steps if you want to proactively whitelist your accounts elsewhere online.

Find out more about our free DMCA protection here: [I found my vid on another site. How do I submit a DMCA takedown request?](#)
