Live Banner Templates

Bring more attention to your scheduled live streams by creating standout banners for your live shows!

You can create your own banner, or if you need some help creating a banner, you can easily make one using one of our Canva templates! All you need to do is add your stream details to the template.

Here's how:

- Click here to access all templates
- Click File > Make a Copy
- Choose a template that suits you best
- Input your Show Title & Stage Name (choosing something that will grab the attention of Members)
- Enter the Date and Time in Eastern Time (*example: Live May 29 - 7PM ET*)
- Select a SFW (non-nude) image of yourself and remove the background (If you have Canva Pro: Click the image > Edit Image > BG Remover. If you do not have Canva Pro, you can use this free background remover tool (https://www.remove.bg/)
- Input the SFW picture of yourself in place of the image placeholder
- Download your banner
- You can now upload your banner to ManyVids and schedule your Live Show (details on scheduling your show can be found here)

When creating your banner please do your best to avoid putting any relevant information near the edges such as the title/name/date/time.

We suggest creating your ad banners and scheduling your live shows in advance to ensure your members know exactly when you'll be live and can come prepared with Tokens!

Our team selects the best banners to be featured on the rotating carousel space on the Live homepage so don't miss your chance to get a visibility boost!

Lastly, did you know that scheduling 2 Live shows per month will unlock "FREE Token Rewards" for the calendar month and your Members will receive FREE Tokens for buying your Vids within that month?!

Please note that your banner must follow our **Content Rules & Guidelines.**
