# Introducing the New “Mobile” Tab on Your Profile

We’ve added a new **Mobile** tab to your profile to highlight your vertical videos and create a more mobile-friendly viewing experience for your audience.

## What’s New?

Your profile now features a **tabbed layout**:

- **ALL**: Displays all your uploaded content. Your mobile (9:16) videos will appear in the **first row "Mobile Vids"** for added visibility.
  - Mobile vid previews will only appear under the ALL tab if there are 5 or more mobile vids uploaded.
- **MOBILE**: Filters and displays **only vertical (9:16)** videos — typically those uploaded from a mobile device. Will sort by Newest vids ONLY.

## How Mobile Videos Are Displayed

- **Format**: Only videos in **9:16 vertical** format will appear in the "Mobile" tab.
- **Thumbnails**: Automatically cropped to fit the vertical layout or upload vertical thumbnails on mobile vids.

## Want to change the thumbnail?

Just click **EDIT** on the video to:

- Select a new frame, or
  - Upload a custom thumbnail that fits the mobile format.
-
